

**Northeast Region**  
Quarterly Report – July/August/September 2021  
Sarah Miller, Director  
Emily Jane Murray, Public Archaeology Coordinator  
Robbie Boggs, Office Manager

### **Outreach: Assistance with Photogrammetry of the Eyster Collection**

Staff from the Northeast and East Central Region trained and assisted staff from the Southeast Region in documenting the artifact from the Eyster Collection of the Florida Keys using photogrammetric methods. Staff photographed, created meshed models, and 3D printed 20 artifacts ranging from precontact shell tools to Florida East Coast Railroad ceramics. The digital models are curated on Sketchfab (url: <https://sketchfab.com/fpan/collections/eyster-collection-of-the-florida-keys>) and the printed models will go on display in a small museum in the Keys.

**Precontact pottery replicas from the Eyster Collection, 3D printed and painted by staff.**

### **Outreach: Assisting UF/Flagler College Field School**

The Northeast and East Central Regions assisted with the joint field school of the University of Florida and Flagler College. Staff hosted a Heritage Monitoring Scouts (HMS Florida) workshop and took students to monitor the Old St. Augustine Lighthouse. Staff also worked with students

to train them in photogrammetric methods, including digitizing artifacts from Fort Mose. (url: <https://sketchfab.com/fpan/collections/fort-mose>)

**UF/Flagler College field school students monitoring the Old St. Augustine Lighthouse.**
